Summary

The manual is a reference to better understand the building of indicators of social expenditure for Tunisia. The definition of indicators is based on ESCWA's Social Expenditure Monitor for Arab States (ESCWA 2019), tailored to Tunisia context. The purpose of this manual is to provide guidance for users to construct the indicators of SEM based on programs/subprograms/special funds and their respective codes in Tunisia. The methodology (codes) used to generate the indicators in Tunisia context is derived from the Tunisia Budget Law, from different line ministries (Annex I).

Three categories of Multiple population groups were identified while mapping Jordan's budget to the SEM framework, which are: (a) Multiple beneficiary categories (01,02,03,04,05,06) reflecting the total population (b) multiple beneficiary categories (Female(02,03)) reflecting female young and adults (c) Multiple beneficiary categories (02,03): reflecting young persons and Adults.

In the following tables, the Tunisian public ministries/entities with contributions to the seven dimensions of the SEM framework have been identified with their corresponding programs, subprograms, and special treasury funds. In some cases, the subprogram maps entirely to a specific indicator while in other cases, the subprogram can be disaggregated between different indicators using the 9-digit paragraph codes or 12-digit sub-paragraph codes disaggregation (when available). At the level of the subprogram's codes, the main beneficiaries were identified as well.
